The Company

FiberVision GmbH was founded in 1995. We are specialized in the development and integration of turnkey-solutions for automation and machine vision.

The essential feature of our systems and products is: The easy access to complex technologies by providing user interfaces for intuitive use.

Our company is continuously growing. In the presence we are with 12 highly qualified employees to your service. It is an interdisciplinary team consisting of computer experts, engineers and physicians. This guarantees the successful solution of your automation task.

We offer machine vision training courses since the year 2000. The seminars are held in the pleasant atmosphere of our new office building. Currently we provide two Vision Academy standard courses as well as customized courses.

Furthermore, we provide machine-vision related services such as consulting, development and the distribution of components.
