## Products

Concentrate on your major tasks – with our products on your side: high availability, reliability, robustness and a good documentation make controlling the production process easy and affordable.

We offer a set of easy to use and powerful tools for the daily needs in industrial production. Our product range contains smart cameras, vision sensors and software.

Of course we provide spare parts and the common accessories and components for your vision-systems, too.

### Types of Products:

- Vision sensors
- Smart cameras
- Vision software
- Vision components
