Quality-Check

Our quality check systems assure that the products delivered satisfy the quality demands of your company. The position (x,y,z) and orientation (φ), the shape (geometry), the color and the completeness can be checked.

With our product databases the inspection is easily switched to other product types.

Furthermore our systems feature various statistical options and provide integration into your quality management system.

Testing tasks:

- Colors
- Contours
- Surface
- Position
- Product identification with Data Matrix
- Integrity
- Completeness
