## Service

In collaboration with the Vision Academy we offer two practical oriented courses Basic Training I and II. Each one concerning the different aspects of machine vision. The courses are targeted at beginners and at advanced users who want to refresh their knowledge.

In addition, we offer you the possibility to take part at custom training lessons especially adapted to your needs. For more information just **contact** us.

The courses take place in our training classrooms in Würselen near Aachen or by arrangement in your own rooms.

Other services we provide are on-the-spot support and expert advise, feasibility studies, error analysis and the optimization of processes.

However, in the first instance our job is to find the solutions that meet your vision related requirements.

### Our services:

- Training in well equipped laboratory
- On-the-spot support
- Feasibility studies
- Process optimization
- Error analysis
