Training

Courses for Machine Vision

As »Schulungszentrum West« of the renown Vision **Academy** provide two Basic Trainings, I and II. These two courses build on each other and concern the foundations of machine vision and its industrial deployment.

The two courses are addressed to beginners as well as to advanced users who want to refresh their knowledge.

By arrangement we provide you customized courses, too. These concern more specific matters of machine vision and are tied to your previous knowledge.

Our training courses are practical orientated and the discussed subject matter is exemplified by using samples from your daily tasks.

Our courses take place in our training classrooms and laboratories in Würselen/Aachen. The dates for our Basic-Trainings can be found on the page »**Events**«.

Subjects :

- Basic-Training I and II:
The foundations of machine vision.
More ...
- The Caminax[®]-Course:
one-day introduction.
